

Programme Outcomes of the Graduating Student
MS (IS)

The programme courses consist of a number of core and elective courses. These courses are market-orientated and cover both the theoretical depth and design and implementation considerations.

- (a) An ability to apply knowledge to effectively solve practical and/or research problems in the domain of Information Security.
- (b) An ability to creatively and systematically solve the problems and meet the challenges of the ever-changing requirements of Information Security.
- (c) An ability to design, implement and evaluate an information system, process, component, or program to meet desired security needs.
- (d) An ability to manage information security with an understanding of professional, legal, security and social issues and responsibilities.
- (e) An ability to communicate effectively with a range of audiences.
- (f) Recognition of the need for and an ability to engage in research.
